Summary

Driven Software Engineering student with a solid foundation in programming and web development. Proficient in HTML, CSS, JavaScript, Java, and C, with a focus on building responsive web applications. Committed to continuous learning and collaboration to deliver effective solutions.

Education

Bachelor of Science: Software Engineering, Daffodil International University - Dhaka 09/2023 – 12/2027
Expected in 01/2028 Focused on software development, web technologies, database systems, and programming fundamentals. Engaged in academic projects, teamwork, and practical problem-solving activities to strengthen technical expertise.

- Coursework in Data Structures, Algorithms, Database Systems, Web Development, Software Engineering

Skills

- Software development
- Responsive design
- Web development
- User interface design
- JavaScript development
- UX and UI design
- HTML coding
- Database management

Projects

Government School Management Website | Personal Project 12/2025 – 04/2026
Built a school website to display notices, teacher information, academic details, and contact information.

Library Management System, Technologies Used: Java, Java OOP, MySQL 02/2025 – 04/2025
A robust Java and MySQL-based application for managing library operations. It enables efficient handling of books, student borrowing records, and return management with a user-friendly interface.
